Board Certified  
Radiation Oncologist*

## **Radiation- new horizons**

**May 17, 6:00 pm -7:00 pm**

When cancer is diagnosed it may be treated in a variety of ways, depending on the nature and complexity of the illness. Radiation therapy is one of the ways to combat certain types of cancer. The goal of radiation therapy is to deliver a high enough dose of radiation into the tumor to kill cancer cells while sparing the surrounding normal tissue from damage. Come learn if radiation therapy is an option for you or a loved one. To register call 352.394.4071, ext. 4412. Free and open to the public.

Physical Medicine &  
Rehabilitation*

## **Myofascial Pain Syndrome**

**June 7, 6:00 pm - 7:00 pm**

Myofascial pain syndrome (MPS) accounts for a vast majority of soft-tissue pain conditions. MPS is a condition characterized by chronic and, in some cases, severe pain. It is associated with and caused by "trigger points" (TrPs), which are localized and sometimes extremely painful contractures ("knots") found in any skeletal muscle of the body. Come learn about MPS and treatment options. To register call 352.394.4071, ext. 4412. Free and open to the public.

Board Certified  
Pediatrician*

## **Common Illnesses in Children and Pediatric Vaccinations**

**July 12, 6:00pm -7:00 pm**

Over the course of their lives, children receive vaccines for up to 15 different illnesses. This discussion will review the purpose for each of these vaccines and the different illnesses they help to prevent. The second part of the discussion will focus on the most common infections in school-aged children such as strep, 5th disease, roseola, MRSA. What are the signs and symptoms, how they are transmitted and what if any are the current treatment recommendations? To register call 352.394.4071, ext. 4412. Free and open to the public.

Unless otherwise noted, all classes are held at the
